Professional Summary

Frontend Developer with 2+ years of experience building scalable, high-performance web applications using React, Node.js and TypeScript. Proven ability to deliver responsive, user-centric UI with optimized performance and reusable component architecture. Strong collaborator with designers and product teams in Agile environments.

Technical Skills

Frontend: HTML5, CSS3, TailwindCss, JavaScript, TypeScript, React, Redux, Zustand, React Query, Next.js.

UI Development: Responsive Design, UI/UX Optimization, Component Architecture, Cross-browser Compatibility.

Backend & APIs: REST APIs, Node.js, Express.js, MongoDB, JWT Authentication, Multer, Nodemailer.

Tools & DevOps: Vite, Docker, Git, GitHub, CI/CD, GitHub Actions, Postman, Vercel, DigitalOcean..

Work Experience

January 2024 - Present

Frontend Developer (Project-based)

- Delivered **10+ scalable web applications**, improving UI responsiveness by **30%** through optimized component rendering.
- Reduced development time by **25%** by building reusable React component systems and modular architecture
- Prevented unnecessary re-renders using **React memo and useMemo hook**, and implemented **lazy loading** techniques.
- Integrated REST APIs and authentication systems, enabling seamless data flow and secure user interactions
- Collaborated with designers and backend engineers in Agile workflows to deliver scalable and user-centric features

Projects

Stream Doing - [Live](#) | [GitHub](#)

November 2025 - Jan 2026

- Reduced deployment friction by **automating CI/CD pipelines**, enabling faster releases and stable production builds.
- Improved application reliability by deploying on **DigitalOcean with secure SSL and custom domain configuration**.
- Developed responsive UI features using **React, TailwindCss, Media Queries**. Implemented scalable **design system**.

Tech Stack: React, TypeScript, Tailwind CSS, Redux, React Query

Adapted Life Style - [Live](#) | [GitHub](#)

March 2025 - July 2025

- Implemented **20+ dynamic UI components using JavaScript and DOM manipulation**, improving interactivity.
- Optimized video playback performance, reducing buffering and improving streaming experience.

Tech Stack: Html, Css, JavaScript, Bootstrap

Alibi Admin Dashboard - [Live](#) | [GitHub](#)

Jan 2025 - March 2025

- Implemented **multi-language support (Arabic / English)** using i18n architecture.
- Converted complex **Figma designs into scalable UI components**.
- Delivered a **pixel-perfect admin dashboard within 15 days** using React and Tailwind.

Tech Stack: React, Tailwind CSS, Radix UI, Recharts

Education

Bachelor of Business Administration (BBA)
National University

Dec 2020 - Present
Thakurgaon, Bangladesh
